FINANCIAL PROPOSAL

BSTI 2.0 – 33 Digital Services

Progressive Service Rollout & Managed Maintenance

Submitted to	**Bangladesh Standards and Testing Institution (BSTI)**
Submitted by	**Orange Business Development Ltd.**
Commercial Model	Service-Based Financial Offer
Commercial Schedule	Rollout: Aug 2026–Dec 2029 | Maintenance: 2030–2031
Date	September 2026

Commercial Overview

The proposal compares a staff-remuneration cost basis with a service-based commercial model for the phased rollout and ongoing maintenance of BSTI 2.0. The service-based model links payment to live services and applies progressive discounts over the contract period, creating a materially lower five-year cost to BSTI while maintaining a predictable commercial structure.

5-YEAR SERVICE OFFER	STAFF COST EQUIVALENT	5-YEAR SAVINGS	COST ADVANTAGE
BDT 186,905,000	**BDT 235,530,000**	**BDT 48,625,000**	**20.6%**
Development + maintenance	Reference remuneration model	Derived from proposal totals	Lower than staff-based model

Five-Year Cost Summary

Cost Component	Staff Remuneration Model	Service-Based Model	Difference / Savings
Development / Rollout (03 Years)	BDT 157,710,000	BDT 111,665,000	**BDT 46,045,000**
Maintenance (02 Years)	BDT 77,820,000	BDT 75,240,000	**BDT 2,580,000**
Total Contract Period	**BDT 235,530,000**	**BDT 186,905,000**	**BDT 48,625,000**

Commercial Logic

- Payment increases progressively as additional services go live, rather than carrying the full 33-service cost from day one.
- Per-service pricing is progressively discounted across the implementation period and further reduced for the maintenance years.
- The two-year maintenance period provides a predictable monthly operating cost after the full 33 service portfolio is live.

Recommended framing for BSTI	**Service-based • phased • discounted**
Position the offer as a five-year managed digital service program rather than a one-time software development purchase.	

1. Proposed Financial Offer – Service Based

Direct commercial offer for progressive rollout of 33 BSTI digital services and two years of managed maintenance.

PROPOSED TOTAL SERVICE-BASED FINANCIAL OFFER	BDT 186,905,000
BDT 111,665,000 for rollout + BDT 75,240,000 for two-year maintenance	

ROLLOUT OFFER	MAINTENANCE OFFER	TOTAL OFFER
BDT 111,665,000	BDT 75,240,000	BDT 186,905,000
Progressive service activation	2030–2031	Commercial offer

1.1 Per-Service Monthly Cost Projection (Year-wise)

Period	Per-Service Monthly Cost	Commercial Treatment
Rest of 2026	**BDT 65,000**	Lump-Sum
2027	**BDT 180,000**	Standard service rate
2028	**BDT 155,000**	13.9% discounted
2029	**BDT 130,000**	27.8% discounted
2030–2031	**BDT 95,000**	47.2% discounted • Maintenance period

Payment Mode: Payment can be made quarterly based on further discussion.

Tax Note: All prices/costs stated in this Financial Proposal are exclusive of VAT, applicable taxes, which shall be applicable as per Government regulations.

1.2 Commercial Structure

- Payment is linked to the number of services live in each period.
- The per-service rate reduces progressively over the rollout period.
- After full rollout, the 33-service portfolio moves to a lower maintenance rate for 2030–2031.

2. Detailed Rollout Payment Schedule

Quarter-wise commercial schedule reflecting the number of live services and applicable per-service rate.

Time Period	Live Services	Monthly Rate / Service	Quarterly / Period Payment
Aug–Dec 2026	5	BDT 65,000	BDT 1,625,000
Jan–Mar 2027	5	BDT 180,000	BDT 2,700,000
Apr–Jun 2027	8	BDT 180,000	BDT 4,320,000
Jul–Sep 2027	11	BDT 180,000	BDT 5,940,000
Oct–Dec 2027	14	BDT 180,000	BDT 7,560,000
Jan–Mar 2028	17	BDT 155,000	BDT 7,905,000
Apr–Jun 2028	20	BDT 155,000	BDT 9,300,000
Jul–Sep 2028	23	BDT 155,000	BDT 10,695,000
Oct–Dec 2028	26	BDT 155,000	BDT 12,090,000
Jan–Mar 2029	29	BDT 130,000	BDT 11,310,000
Apr–Jun 2029	32	BDT 130,000	BDT 12,480,000
Jul–Sep 2029	33	BDT 130,000	BDT 12,870,000
Oct–Dec 2029	33	BDT 130,000	BDT 12,870,000
TOTAL			**BDT 111,665,000**

Rollout Commercial Total

Total service-based payment during progressive rollout Schedule covers Aug 2026 through Dec 2029 as provided in the commercial model.	**BDT 111,665,000**

3. Maintenance Offer – 2030 to 2031

Two-year managed maintenance period after the full 33-service portfolio is live.

Year	Month	Live Services	Monthly Payment	Yearly Payment
2030	Jan–Dec	33	BDT 3,135,000	BDT 37,620,000
2031	Jan–Dec	33	BDT 3,135,000	BDT 37,620,000
TOTAL				**BDT 75,240,000**

TOTAL TWO-YEAR MAINTENANCE OFFER	BDT 75,240,000
BDT 37,620,000 per year for 33 live services	

3.1 Commercial Basis of the Offer

The service-based offer is structured around actual service activation rather than presenting BSTI with the full equivalent staffing cost at the outset. The commercial rate therefore scales with the live-service portfolio and then transitions to the lower maintenance rate once all services are operational.

01 ⇒	02 ⇒	03 ⇒	04
Start with 5 live services	**Add services progressively**	**Reach 33 live services**	**Move to maintenance rate**

4. Cost Justification – Staff Remuneration Basis

Reference equivalent-team cost demonstrating the resource requirement behind development and progressive rollout.

For justification of the commercial offer, the proposal also calculates the cost of maintaining an equivalent multidisciplinary delivery team. The reference team includes project management, architecture, analysis, engineering, database, DevOps, cybersecurity, UI/UX, QA, documentation, training, support, helpdesk and financial expertise.

4.1 Development & Rollout Staff Cost

SL	Position	No.	Months	Salary (BDT)	Total (BDT)
1	Project Manager	1	36	250,000	9,000,000
2	Project Coordinator	1	24	100,000	2,400,000
3	Solution Architect	1	18	200,000	3,600,000
4	Senior System Analyst	1	18	180,000	3,240,000
5	Business Analyst	4	36	130,000	18,720,000
6	Lead Software Engineer	3	36	200,000	21,600,000
7	Software Engineer	7	36	140,000	35,280,000
8	Database Administrator	1	24	140,000	3,360,000
9	DevOps Expert	1	36	150,000	5,400,000
10	Cybersecurity Expert	1	18	180,000	3,240,000
11	UI/UX Expert	1	18	140,000	2,520,000
12	QA Manager	1	24	150,000	3,600,000
13	QA Engineer	3	36	100,000	10,800,000
14	Technical Documentation Expert	1	12	70,000	840,000
15	Training Manager	1	18	75,000	1,350,000
16	Trainer	2	18	60,000	2,160,000
17	Support Manager	1	36	90,000	3,240,000
18	Support Engineer	6	36	65,000	14,040,000
19	Helpdesk Executive	6	36	45,000	9,720,000
20	Accounts & Finance Consultant	1	12	300,000	3,600,000
	TOTAL				**157,710,000**

Development / rollout staff-remuneration reference cost Monthly equivalent across 36 person-month billing months: BDT 4,380,833	**BDT 157,710,000**

5. Staff-Based Maintenance Cost & Why It Is Higher

Reference team cost for the two-year maintenance and support period.

SL	Position	No.	Months	Salary (BDT)	Total (BDT)
1	Project Manager	1	24	250,000	6,000,000
2	Business Analyst	3	24	130,000	9,360,000
3	Database Administrator	1	12	140,000	1,680,000
4	Lead Software Engineer	1	24	200,000	4,800,000
5	Software Engineer (L3)	6	24	140,000	20,160,000
6	DevOps Expert	1	18	150,000	2,700,000
7	Cybersecurity Expert	1	12	180,000	2,160,000
8	QA Engineer	3	18	100,000	5,400,000
9	Training Manager	1	24	75,000	1,800,000
10	Trainer	4	24	60,000	5,760,000
11	Support Manager (L2)	1	24	90,000	2,160,000
12	Support Engineer (L2)	6	24	65,000	9,360,000
13	Helpdesk Executive (L1)	6	24	45,000	6,480,000
	TOTAL				**77,820,000**

Two-year maintenance staff-remuneration reference cost

Monthly equivalent across 24 months: BDT 3,242,500

BDT 77,820,000

5.1 Why the Staff-Remuneration Basis Is High

- The reference model carries a multidisciplinary team spanning management, business analysis, engineering, infrastructure, security, QA, training and operational support.
- Many roles are costed for long person-month commitments across the rollout and support periods.
- After development, the maintenance model still requires technical, support, training and helpdesk resources to sustain all 33 services.
- The resulting reference cost is BDT 235,530,000 for development/rollout plus maintenance.

6. Comparison of the Two Commercial Models

The service-based offer is presented first as the recommended commercial approach; the staff-remuneration model is retained as the cost-justification benchmark.

Cost Component	Service-Based Offer	Project Basis	BSTI Savings	Cost Advantage
Development / Rollout (03 Years)	BDT 111,665,000	BDT 157,710,000	BDT 46,045,000	29.2%
Maintenance (02 Years)	BDT 75,240,000	BDT 77,820,000	BDT 2,580,000	3.3%
TOTAL	**BDT 186,905,000**	**BDT 235,530,000**	**BDT 48,625,000**	**20.6%**

SERVICE-BASED OFFER	REFERENCE STAFF COST	TOTAL BSTI SAVINGS
BDT 186,905,000	**BDT 235,530,000**	**BDT 48,625,000**
Recommended commercial offer	Equivalent remuneration basis	20.6% lower overall

6.1 Commercial Conclusion

The service-based model provides BSTI with the complete commercial roadmap at BDT 186,905,000, while the equivalent staff-remuneration basis is BDT 235,530,000. The proposed model therefore reduces the reference cost by BDT 48,625,000, equivalent to an overall cost advantage of approximately 20.6%.

RECOMMENDED PROPOSED FINANCIAL OFFER	BDT 186,905,000
Progressive rollout of 33 services + two-year managed maintenance	

Key Financial Rationale

- Direct payment is tied to the live-service portfolio rather than the full equivalent staffing cost.
- The service rate declines progressively as the program matures.
- BSTI retains a predictable maintenance cost after all 33 services are live.
- The proposal demonstrates a BDT 48,625,000 saving against the reference staff-remuneration basis.
